ABOUT THE THEME

This conference aims to delve into the forefronts of knowledge and innovation in the field of animal sciences. With the rapid advancements in technology and changing societal needs, the study of animals and their ecosystems has become more crucial than ever before. Our collective understanding of the animal kingdom is poised to shape the future of our planet, whether it be unraveling the mysteries of animal behavior or addressing the complex challenges of sustainable climate and conservation.

Join the seminar to update your knowledge on recent developments in Animal Science. All are welcome!

OBJECTIVES

The conference aims to discuss the key challenges in animal science research, including how to manage, conserve, and increase animal resources' productivity in a sustainable manner. The focus will also be on the global application of animal biodiversity for nation-building, recent approaches, and consequences in animal science research programs, from the morphology to molecule and from individuals to the global level.
