

P. G. Department of Population Studies

Syllabus: 2021-22
M. A. in Population Studies

Fakir Mohan University
Vyasa Vihar, Nuapadhi
Balasore - 756 089, Odisha

COURSE STRUCTURE

SEMESTER-WISE LIST OF PAPERS FOR M. A. IN POPULATION STUDIES						
Paper	Title	Theory/ Practical/ Project	Credit	Mark Distribution		
				Mid-Term	End-Term	Total
First Semester						
PS-101	Principles of Population Studies	Theory	4	20	80	100
PS-102	Sources of Demographic Data	Theory	4	20	80	100
PS-103	Nuptiality and Fertility	Theory	4	20	80	100
PS-104	Morbidity and Mortality	Theory	4	20	80	100
PS-105	Computer Applications	Theory	4	20	80	100
Thematic Discussion		Presentation				
Second Semester						
PS-201	Statistical Methods	Theory	4	20	80	100
PS-202	Migration and Urbanization	Theory	4	20	80	100
PS-203	Exclusion and Inclusive Policy	Theory	4	20	80	100
PS-204	Epidemiology and Public Health	Theory	4	20	80	100
PS-205	Population and Environment	Theory	4	20	80	100
Guided Reading		Presentation				
Third Semester						
PS-300	Fakir Mohan Studies	Theory	Non-Credit	20	80	100
PS-301	Social Research Methods	Theory	4	20	80	100
(Specialization-A: Development Studies)						
PS-302A	Dynamics of Development	Theory	4	20	80	100
PS-303A	Agriculture and Food Security	Theory	4	20	80	100
PS-304A	Gender and Reproductive Health	Theory	4	20	80	100
(Specialization-B: Monitoring and Evaluation)						
PS-302B	Fundamentals of Monitoring and Evaluation	Theory	4	20	80	100
PS-303B	Analytical Methods in Evaluation	Theory	4	20	80	100
PS-304B	Large Scale Data Evaluation	Theory	4	20	80	100
PS-305	Rudiments of Population Studies (CBCS)	Theory	4	20	80	100
Group Discussion		Presentation				
Fourth Semester						
PS-401	Statistical Methods and Measures	Practical	4	--	100	100
PS-402	Demographic Techniques and Measures	Practical	4	--	100	100
PS-403	SPSS Fundamentals	Practical	4	--	100	100
PS-404	Proposal and Findings Presentation	Project	4	--	100	100
PS-405	Dissertation and Viva-voce	Project	4	--	100	100
Personality Development		Presentation				
Total Credit Hours			80	300	1700	2000

OBJECTIVES AND OUTCOMES OF THE PROGRAMME:

Population Studies explores the linkages between 'population' and 'development' in India, focusing on the intersection of population issues with areas such as health, family planning, education, opportunities for livelihoods, environmental safety and sustainable development. Further, the subject covers the new areas of employment opportunities like Monitoring and evaluation, data analytics and monitoring information system, etc. Population Studies is a professional and job oriented programme which comprises of four semesters in two years. The students successfully completing this programme can work in different government and private sectors. The opportunities are not limited to various educational institutions like universities and research institutes. But there are opportunities at UN organisations, Philanthropic foundations, market research agencies, survey organizations and NGO/ Development sectors, etc. With the expansion of research institutes and CSR funds, more number of job opportunities opens for the population studies students. The curriculum and pedagogic structure of this program is designed in line with the emerging needs of population scientist profession for research, monitoring and evaluation. At the end of the course, students will be able to demonstrate an understanding of the essential principles of modern demographic methods and statistical software and how to apply them. And also students will be able to analyse, interpret and criticise demographic, health and public health research.

First Semester

PS-101: PRINCIPLES OF POPULATION STUDIES

Learning objectives: This is the first basic paper of the Population Studies course. The objective of this paper is to introduce the students to the scope and importance of the discipline of population studies.

Course outcomes: At the end of this course, including lectures and assignments, the students are expected to get clear idea of the evolution and the scope of the discipline, past, present, and future scenario of population growth and age and sex structures of the world, major regions, and India. Fertility, mortality, Migration and urbanization are the characteristics of structural change taking place in a society. Their study is essential to understand the dynamics of this change. Further, students will be familiar with various sources of demographic data with a focus on India, as well as the strengths and weaknesses of data sets. Current international, national and local population growth related issues will be captured in this paper. This is theoretical paper which will build base and context for further advance demography and population data analysis.

Unit-I

Demographic Concepts and Definitions: Population, Nuptiality, Fertility, Morbidity, Mortality, Migration, Urbanization; Basic Measures: Cohort, Period, Mid-Year Population; Nature and Scope of Population Studies; Its Relationship with Other Disciplines; **Components of Population Change and Balancing Equation.**

Unit-II

History of Demographic Data: Major sources of data about the population in the past; Global Population Trends-Past, Present and Future Trends across the World and Developed/Developing Countries; World Population Growth and Doubling Time; **History of Population Growth in India**; Current Population Scenario and Demographic Profile of India and States.

Unit-III

Basic Theories of Population: Malthusian, Marxian and Optimum Population Theories; Biological Theories of Herbert Spencer, **Corrado Ginnis and Thomas Doubleday**; Demographic Transition: Concept, Theory and Different Stages- Pre-Industrial Stage, Industrial Revolution, Post-Industrial Revolution.

Unit-IV

Population Composition and Characteristics: Age-Sex Structure (Pyramid), Sex Ratio, Sex Ratio at Birth, Marital Status, Rural-Urban Distribution; Occupation, Education, Religion and Caste Composition; Age-Sex Structures of Population in Developed and Developing Countries; **Importance of Age-Sex Structure in Population Dynamics; Factors Affecting Sex Ratio of the Population.**

Unit-V

Population Ageing: Socio-economic Consequences of Population Ageing in the World and India. Population Ageing and Labour Force: Implications of Population Ageing on Labor Force, **Retirement and Work Participation among Elderly; Occupational Distribution among the Elderly**; Policies on Population Ageing; Demographic Dividend: Determinants and Consequences.

Suggested Readings:

- Agarwala, S. N. (1981), *India's Population Problems*, Tata McGraw Hill, New Delhi.
- Bhende, A. and T. Kanitkar (2019), *Principles of Population Studies*, Himalaya Publishing House, Mumbai.
- Bloom, D.E., D. Canning, et.al. (2002): *The Demographic Dividend: A New Perspective on the Economic Consequences of Population Change*. Santa Monica, CA, RAND
- Bogue, Donald J. (1969), *Principles of Demography*, John Wiley and Sons Inc., New York.
- Bose, Ashish (2001), *Population of India: 2001 Census Results and Methodology*, B. R. Publishing Corporation, Delhi.
- Heslop A (1999), *Ageing and Development*, Social Development Working Paper: 3, Help Age International.
- Mason, A. (2007), "Demographic Dividends: The Past, the Present, and the Future", in A. Mason and M. Yamaguchi (eds.), *Population Change, Labor Markets and Sustainable Growth: Towards a New Economic Paradigm*, Emerald Publishing Limited, Bingley.

- Prskawetz, Bloom, and Lutz, eds., (2008), *Population Aging, Human Capital Accumulation, and Productivity Growth*, A Supplement to Population and Development Review.
- Shrivastava, O. S. (1983), *A Text Book of Demography*, Vikas Publishing House Pvt. Ltd., Delhi.
- Shryock, Henry S., Jacob S. Siegel and Associates (1976), *The Methods and Materials of Demography*, Academic Press, Inc., California.
- United Nations (1973), *The Determinants and Consequences of Population Trends*, Vol. I, Department of Economic and Social Affairs, New York.
- Weeks, John R. (2015), *Population: An Introduction to Concepts and Issues*, Wadsworth Publishing Company, California.
- World Health Organization (2015), *WHO Report on Ageing and Health*, WHO, Geneva.

PS-102: SOURCES OF DEMOGRAPHIC DATA

Learning objectives: In this course students learn the different sources of data and adjustment of demographic data, with more focus of age-sex and other related characteristics of population data.

Course outcomes: After completion of this course students are expected to get a vision to judge the best sources of data, quality of data, comment on it and adjust the data. At the end of the course, student will learn population census across the world, Census taking under British India, Indian census, details of different items on which Indian census collect data, publication of census data/ reports and other sources of demographic data (SRS, DLHS, NFHS, NSSO and LASI, etc). This paper will give exposure to see reputed international and national data collection sources and their strengths and weakness for utilization. It will give idea regarding local level data collection and what challenges will be remain and how to tackle them. This is theoretical paper which will build base and context for further advance demography and population data analysis and data collection.

Unit-I

Sources of Demographic Data: Census, Vital Registration System, Sample Survey, Dual Report System, Population Registers; Population Census: History, Definition and Scope; Indian Census: Historical Background, Coverage, Features and Uses, **Strengths and Weaknesses of Census.**

Unit-II

Sample Registration System in India: History and different Acts of Sample Registration System, Uses and Limitations; Difference between Civil Registration System and Sample Registration System; **National Sample Survey Organization (NSSO) and its Different Rounds.**

Unit-III

Demographic and Health Surveys (History, Objectives/Goals, Questionnaire, Available Information): World Fertility Survey (WFS); National Family and Health Survey (NFHS); District Level Household and Facility Survey (DLHS); **Indian Human Development**

Survey (IHDS); Annual Health Survey (AHS); Longitudinal Aging Study in India (LASI); Comprehensive Nutrition Survey; Global Youth Tobacco Survey (GYTS) - India; National Mental Health Survey of India.

Unit-IV

United Nation's Data: Demographic Yearbook, World Population Prospects, Data and reports of UNICEF, UNFPA, UNDP and UNIFEM; **World Health Organization WHO): Data Bank, Indicators, Countries Covered; Data of ILO (International Labour Organization); Data of IMO (International Organization for Migration);** Data and reports of World Bank

Unit-V

Data Appraisal (Evaluation and Adjustment of Data): Types and Sources of Errors in Population Data; Adjustment in Age Data: Graphical Representation of Age Data, Whipple's Index, Myer's Index, United Nation's **Age-Sex Accuracy Index-Assumptions, Applications and Limitations;** Completeness of Vital Registration Data; Chandrasekaran's Deming Formula; Smoothing of Age Data.

Suggested Readings:

- Bhende, A. and T. Kanitkar (2019), *Principles of Population Studies*, Himalaya Publishing House, Mumbai.
- Bose, Ashish (2001), *Population of India: 2001 Census Results and Methodology*, B. R. Publishing Corporation, Delhi.
- Crook, Nigel (1997), "Principles of Population and Development: With Illustrations from Asia and Africa", in Ian Timaeus and Nigel Crook (eds.), *Population and Subsistence: Theories and Evidences: Part-I*, Oxford University Press, London.
- Demeny, Paul (2003), *Population Policy: A Concise Summary*, Policy Research Division Working Paper No. 173, Population Council, New York.
- Hauser, Philip M. and O. D. Duncan (eds.) (1959), *The Study of Population*, University of Chicago Press, Chicago.
- Pathak, K. B. and F. Ram (1998), *Techniques of Demographic Analysis*, 2nd Edition, Himalaya Publishing House, Bombay.
- Srinivasan, K. (1998), *Basic Demographic Techniques and Applications*, Sage Publications, New Delhi.
- Stauffer, Cheryl Lynn (ed.) (2000), *Human Population: Fundamentals of Growth and Change*, Population Reference Bureau, Washington, D.C.

PS-103: NUPTIALITY AND FERTILITY

Learning objectives: In this paper student will learn one of the important components of population growth which is fertility and how nuptiality creates context of birth is incorporated here.

Course outcomes: After completion of this course the student will be able to distinguish among different terms used for fertility study, describe physiology of human reproduction and methods of family planning, identify different sources of data to calculate different indicators of fertility, understand levels, trends and differentials in fertility, describe the theories of fertility, calculate and interpret different indicators of fertility. All the fertility and nuptiality measures can be estimated for local situation analysis and theories contain

generalization base and critically analyze current local fertility phenomena. This paper basically theory based but remains huge manual calculation and estimation features.

Unit-I

Nuptiality: Concept and Definitions; Sources and Quality of Data; Basic Measures of Nuptiality; Computation of Singulate Mean Age at Marriage (SMAM): John Hajnal's and Agarwala's Methods; Coale's Standard Age-pattern of Nuptiality; Age at Marriage: Levels and Trends in Developed and Developing Countries; **Age at Marriage in India and States; Determinants of Age at Marriage; Differentials in Age at Marriage.**

Unit-II

Importance of Studying Fertility; Basic Concepts in Fertility – Fetus, Embryo, Fecundity, Fecundability and Sterility, Birth Order and Parity, Parity Progression Ratio; Basic Measures of Fertility: Crude Birth Rate, General Fertility Rate, Age-specific Fertility Rate, Total Fertility Rate, Gross Reproduction and Net Reproduction Rates, Child-Woman Ratio; Parity Progression Ratio; Indirect measures of fertility :Reverse Survival Method, Rele's Method, P/F Ratio;**Fertility Differentials by Socio-economic Status; Sex Preference and its Relation with Fertility.**

Unit-III

Fertility Decline in European and Non-European Industrialized Countries; Factors and Implications of Fertility Decline in Developed Countries; Pattern of Fertility Transition in Developing Countries With Special Focus on SAARC Region; **Fertility Transition in India: Historical Trends and Regional Patterns.**

Unit-IV

Theories of Fertility: Davis and Blake Intermediate Variable Framework and Bongaart's Proximate Determinant Model; **Social Capillarity Theory; Theory of Diffusion and Cultural Lag;** Theories of Leibenstein, Becker and Easterlin; UN Threshold Hypothesis. Lee and Bulatao framework of fertility determinants, Types of Abortion, Post Partum Amenorrhea.

Unit- V

Family Planning: Meaning, Objectives and Importance; History of Family Planning Movement in the World; Evolution of Family Planning Programme in India; Methods of Family Planning: Modern and Traditional Methods; Use and Effectiveness of Family Planning Methods; **Contraceptive Rates: Prevalence and Continuation Rates; Concept of Unmet Need for Family Planning;** Family Planning and HIV; Adolescent, Youth and Family Planning; Sex Preference and Family Planning.

Suggested Readings:

- Bhende, A. and T. Kanitkar(2019),*Principles of Population Studies*, Himalaya Publishing House, Mumbai.
- Caldwell, J.C. (1982),*Theory of Fertility Decline*, Academic Press, Inc., London.
- Driver, Edwin D. (2016), *Differential Fertility in Central India*, Princeton University Press, New Jersey.
- Guilmoto, C. Z. and S. I. Rajan(2001),“Spatial Patterns of Fertility Transition in India Districts”, *Population and Development Review*, 27(4), 713-38.
- Hauser, Philip M. and O. D. Duncan (eds.) (1959),*The Study of Population*, University of Chicago Press, Chicago.

- Shryock, Henry S., Jacob S. Siegel and Associates (1976), *The Methods and Materials of Demography*, Academic Press, Inc., California.
- Bongaarts, J. and Robert G. Potter (1983), *Fertility, Biology and Behaviour: An Analysis of the Proximate Determinants*, Academic Press, Inc., New York.
- Rele, J. R. (1987), "Fertility Levels and Trends in India, 1951-81", *Population and Development Review*, 13(3), 513-530.

PS-104: MORBIDITY AND MORTALITY

Learning objectives: In this paper student will learn knowledge of health, nutrition, morbidity and mortality.

Course outcomes: After completion of this course the student will be able to: identify different sources of morbidity and mortality data and their quality; able to understand basic Concepts and definitions: Miscarriage, abortion, fetal deaths, still births, live birth, deaths, early and late neonatal death, infant death, child death; describe Mosley and Chen Framework for the Study of Child Survival; calculate and interpret different indicators of mortality and morbidity. This paper will give worldwide knowledge regarding nutrition measurement, reduction of infant death, measurement of disease and mortality which gives direction to local level problem identification. This paper basically theory based but remains huge manual calculation and estimation features.

Unit-I

Concept of Health: Nutrition, Morbidity and Mortality; Health Transition: Importance of its Study for Policy and Public Intervention; Anthropometric Measurements of Child Nutrition: Weight-for-Age, Height-for-Age and Weight-for-Height Measures; Measurement of Morbidity: Incidence and Prevalence Rates; **Point and Period Prevalence Rates; Short and Long Duration Morbidity Rates;** Sources, Quality and Use of Morbidity Data.

Unit-II

Mortality: Concept and Definition; Basic Measures: Crude Death Rate, Specific Death Rates (Age-specific Death Rate, Sex-specific Death Rate, Cause-specific Death Rate) Maternal Mortality (Rates & Ratio), Sisterhood method, Still birth, Peri-natal, Early Neonatal, Late neo-natal, Post neo-natal mortality rate, Infant mortality rate, U-5 Mortality, Child Mortality; **Basic concepts and brief history of life table, types and forms of life table, Lexis diagram.**

Unit-III

Mosley and Chen Framework for the Study of Child Survival; Levels and Trends of Infant and Child Mortality in Odisha; **Causes of High Infant and Child Deaths in EAG States;** Levels, Trends and Determinants of Mortality in Developed and Developing Countries with special reference to India.

Unit-IV

Communicable and Non-Communicable Diseases: Concepts and Causes of Sickness, Major Issues of Community Health: Immunization, Nutrition, **Reproductive and Child Health, Sanitation;** Issues of Women's Health; Disability-Adjusted Life Year (DALY); Disability-Adjusted Life Expectancy (DALE).

Unit-V

Cross-examination of Morbidity and Mortality by Ethnicity, Education, Gender, Nutrition, Age and Sex; Occupational Morbidity and Health Hazards; Public Health Expenditure in India; **Out of Pocket Expenditure for Morbidity and its Variation by Income**, Marital Status and Place of Residence.

Suggested Readings:

Bhende, A. and T. Kanitkar (2019), *Principles of Population Studies*, Himalaya Publishing House, Mumbai.

Bose, Ashish (2001), *Population of India: 2001 Census Results and Methodology*, B. R. Publishing Corporation, Delhi.

Das Gupta, Monica, L. C. Chen and T. N. Krishnan (eds.) (1996), *Health, Poverty and Development in India*, Oxford University Press, Delhi.

Demeny, Paul (2003), *Population Policy: A Concise Summary*, Policy Research Division Working Paper No. 173, Population Council, New York.

Mahadevan, K. (ed.) (1992), *Health Education for Quality of Life*, B. R. Publishing Corporation, Delhi.

Park, K. (2015), *Text Book of Preventive and Social Medicine*, Bhanot Publishers, Jabalpur.

Preston, Samuel H. (ed.) (1982), *Biological and Social Aspects of Mortality and the Length of Life*, Ordina Editions, Liege.

Shryock, Henry S., Jacob S. Siegel and Associates (1976), *The Methods and Materials of Demography*, Academic Press, Inc., California.

Srinivasan, K. (1998), *Basic Demographic Techniques and Applications*, Sage Publications, New Delhi.

United Nations (1973), *The Determinants and Consequences of Population Trends*, Vol. I, Department of Economic and Social Affairs, New York.

PS-105: Computer Applications

Learning Objectives: Ultimate aim of this unit is to empower students in their computer skill development because basics of computer skill and knowledge require for further software learning like in SPSS and STATA.

Course Outcomes: After completion of this unit students will learn basic knowledge of computer and able to handle MS excel, MS word, PowerPoint etc. important computer skills.

Unit-I

Basic Applications of Computer, Components of Computer System, Central Processing Unit, Keyboard, Mouse and VDU, Other Input Devices, Other Output devices, Computer Memory, **Concepts of Hardware and Software.**

Unit-II

Basics of Operating System, Basics of Popular Operating System (LINUX, WINDOWS), Word Processing Basics, Opening Word Processing Package, Menu Bar, Using the Help, **Using the Icons Below Menu Bar.**

Unit-III

Opening and Closing Documents, Opening Documents, Save and Save As, Page Setup, Print Preview, Printing of Documents, Elements of Electronic Spread Sheet, Opening of Spread Sheet, **Addressing of Cells, Printing of Spread Sheet, Saving Workbooks.**

Unit-IV

File Management, System Maintenance, Protection from Virus, Worms, Malware and Spyware, Search Engine; Graphical User Interface(GUI): Concept of GUI, Evolution of Human and Machine Interface, Common Graphical User Interface terms, Functionality of **Graphical User Interface, A Look at Some Graphical User Interfaces.**

Unit-V

Practice: Basics of Microsoft Office: Word (Formatting, Table Creation etc.), Excel (Calculation and Formula Writing), Power Point (Hyperlink, Animation, etc.), Web Browsing, Basics of Email and Online Applications, Scanning of Documents, **CD Writing, Preparation of CV/Resume.**

Suggested Readings:

Sinha, Pradeep K. and Priti Sinha (2004).*Computer Fundamentals*, 8th Edition, BPB Publications, Kolkata.

Rajaraman, V. (2014).*Fundamentals of Computers*, 6th Edition, PHI Publications, Delhi.

Peter Nortons (2017).*Introduction to Computers*, Sixth Edition, Tata McGraw Hill, Noida.

Thomas C Bartee (2001).*Digital computer Fundamentals*, TATA McGraw Hill, Noida.

Thomas L Floyd (2015).*Digital Fundamentals*, Ninth edition, Pearson Education India, Delhi.

S. K. Bansal (2001).*Internet Technologies*, APH Publishing Corporation, Delhi.

Wallace Wang (2011).*MS-Office 2007 for Dummies*, Wiley Publishing Inc.

A. Goel (2010).*Computer Fundamentals*, Pearson Education India, Delhi.

PS-201: STATISTICAL METHODS

Learning objectives: This course aims to provide students with basic knowledge of statistical techniques which can be used in demographic analysis.

Course Outcomes: Understand basics of Statistical Techniques used in population data analysis. Also, to understand types of Sampling used in social research. It also helps students to understand applied statistics used in research.

Unit I

Definition and Scope of Statistics; Collection and Classification of Data; Frequency Distribution: Uni-variate and Bi-variate; Table: Construction and Types; Graph: Histogram, Bar-diagram, Frequency Polygon, Ogive and Pie-chart; **Series: Individual, Discrete and Continuous.**

Unit II

Measures of Central Tendency: Mean, Median and Mode; Measures of Dispersion: Range, Quartile Deviation, **Mean Deviation and Standard Deviation**; Coefficient of Variation; Measures of Skewness and Kurtosis; Measures of Location: Quartile, Decile and Percentile.

Unit III

Concepts of Statistical Population and Sample; Concepts of Sample, Parameter and Statistic; Sampling Distribution of a Statistic, Types of Sampling: Probability and Non-probability Sampling; **Sample Variance and Sample Proportion**; Estimate of Standard Error.

Unit IV

Probability: Concept and Basic Properties, Distribution: Normal and Abnormal; Moving Average; Arithmetic and Exponential Growth Rates; Interpolation and Extrapolation; Dependent and Independent Variables; **Bi-variate and Multivariate Association between Different Variables/Factors**.

Unit V

Correlation Analysis - Pearson and Spearman Coefficients; Regression Analysis: Linear Regression and Multiple Regression Models; Concepts of Hypothesis, Null and Alternative Hypotheses, **Level of Significance, Type I and Type II Errors**; Parametric Tests: 'F', 't' and 'Z'; Non-Parametric Tests and their Uses, Chi-square Test.

Suggested Readings:

Blalock (Jr.), Hubert M. (1979), *Social Statistics*, McGraw-Hill, New York.

Croxton, F. E., D. J. Cowden and S. Klein (1982), *Applied General Statistics*, Prentice-Hall of India, New Delhi.

Goon, A. M., M. K. Gupta and D. Dasgupta (1985), *Basic Statistics*, World Press, Calcutta.

Gupta, S. C. (1992), *Fundamentals of Statistics*, Himalaya Publishing House, Bombay.

Ramchandran, P. (1968), *Social Work Research and Statistics*, Allied Publishers, Bombay.

Siegel, Jacob S. and David A. Swanson (eds.) (2004), *The Methods and Materials of Demography*, Elsevier Academic Press, San Diego.

Snedecor, G. W and W. G. Cochran (1994), *Statistical Methods*, Oxford and IBH Publishing Company, New Delhi.

Weiss, Robert S. (1968), *Statistics in Social Research: Introduction*, John Wiley and Sons, New York.

PS-202: MIGRATION AND URBANIZATION

Learning objectives: The aim of this course is to familiarize the students about the demographic aspects of migration, spatial distribution and urbanization.

Course Outcomes: On completion of this course students are expected to learn about the scientific definitions of migration, urbanization and spatial distribution, their patterns, trends, causes and consequences. Students are also expected to learn about the data sources and their constraints and the techniques to analyse migration, spatial distribution and urbanization.

Unit I

Concepts of Mobility and Migration; Sources of Migration Data; Types of Migration; Internal Migration: Patterns and Characteristics in Developing Countries with Special Focus on India; Determinants of Internal Migration: Causes of Migration at the Place of Origin and at the Place of Destination; Consequences of Internal Migration: Demographic, **Economic, Social and Political Consequences at the Individual, Household and Community Level**.

Unit II

International Migration: Sources of Data and Types - Labour Migration, Brain Drain, Refugee and Illegal Migration; Determinants; Consequences upon Demography, Economy and Society; Socio-economic Effects of Remittances; Linkage of International Migration with Health; **World System Theory, Social Network Theory, Cumulative Causation Theory.**

Unit III

Urbanization: Concept, Importance of Study and Sources of Data; Urban and Related Concepts used in Indian Census; Components of Urban Population Growth; Kingsley Davis Model of Urbanization; Level and Tempo of Urbanization; **City Population Distribution; Rank Size Rule and Primacy Index.**

Unit IV

Direct Measures of Internal Migration: Estimation of Lifetime and Inter-censal Migration from Place of Birth; Duration of Residence and Place of Last Residence Data; Indirect Measures of Internal Migration: National Growth Rate Method; Vital Statistics Method; **Survival Ratio Methods; Problems of Base Population.**

Unit V

Theories of Internal and International Migration – Ravenstein’s Laws of Migration, Everett Lee’s Theory of Migration, Todaro’s Model of Rural-Urban Migration, Lewis-Fei-Ranis, Stouffer, Zelinsky, Neoclassical Economic Theory, New Household Economic Theory, Dual Labour Market Theory, World System Theory, **Social Network Theory, Cumulative Causation Theory.**

Suggested Readings:

- Chandana, R. C. (2002), *Geography of Population: Concepts, Determinants and Patterns*, Kalyani Publishers, New Delhi.
- Chopra, Kanchan (2001), *Migration, Common Property, Resources and Environmental Degradation*, Sage Publications, New Delhi.
- Halton, T. J. and J. G. Willianson (1998), *The Age of Mass Migration: Causes and Economic Impact*, Oxford University Press, New York.
- Mangalam, J. J. (1968), *Human Migration: A Guide to Migration Literature*, University of Kentucky Press, Lexington.
- Pathak, K. B. and F. Ram (1992), *Techniques of Demographic Analysis*, Himalaya Publishing House, Bombay.
- Shaw, Gareth and Dennis Wheeler (1985), *Statistical Techniques in Geographical Analysis*, John Willey and Sons, Chichester.
- Siegel, Jacob S. and David A. Swanson (eds.) (2004), *The Methods and Materials of Demography*, Elsevier Academic Press, San Diego.
- Yadava, K. N. S. (1989), *Rural-Urban Migration in India: Determinants, Patterns and Consequences*, Independent Publishing Company, Delhi.

PS-203: EXCLUSION AND INCLUSIVE POLICY

Learning objectives: Main aim of this unit is to introduce the important issues of Indian society and give them a brief idea of previous program, policy, schemes in India.

Course outcomes: Students will get know about social exclusion in our Indian society especially about Dalit, religious minority, vulnerable women status etc. Societal exclusion, discrimination, segregation in terms of gender, caste will be highlighted in this unit and major adopted programs in past.

Unit-I

Social Exclusion: Concept, Meaning and Forms of Social Exclusion (Multidimensional - Social, Political, Economic and Cultural); Who is Socially Excluded and Why? -Dalit, ST, Religious Minorities, Children, Women, Aged, **Physically and Mentally Challenged People, Migrants and Refugees.**

Unit-II

Philosophical Foundations: Equality, Freedom, Justice, Human Dignity, Self-respect, Human Values, Individual and Collective, Power and Authority, Right to be Human, Moral and Ethical Base of Human Kind; Universal Declaration of Human Rights, International Covenant on Civil and Political Rights (ICCPR), **International Covenant on Economic, Social and Cultural Rights (ICESCR).**

Unit-III

Inclusive Policy: Concepts, Meaning and Forms of Social Inclusion, Poverty and Dimensions of Social Exclusion; Reducing Poverty by Tackling Social Exclusion; Current Policies of Protective Discrimination, Public Policies to reduce Social Exclusion, Constitutional Safeguards, **Post-industrial Structuralism, Norm of Structural Exclusion.**

Unit- IV

Women: Development of International Norms for Protection of Women, National Commission for Women; Scheduled Castes/Scheduled Tribes: National Commissions, State Commissions; Protection of Civil Rights (PCR) Act, and the subsequent SC and ST Prevention of Atrocities Act 1989 and Rules 1995;**Declaration on the Rights of Indigenous Peoples.**

Unit- V

Development and Trade off on Human Rights: The Divide between the Developing Countries and the Developed Countries; From ITO to WTO: Uruguay Round of GATT Negotiations; Technology and Workers Rights; From Consumer Rights to Human Rights; Trade related sanctions for human rights violations. Employment of Manual Scavengers and Construction of Dry Latrines (Prohibition), Act 1999, **Housing Scheme for Marginalized Communities, Interrelationship between Inclusive Policy and Development.**

Suggested Readings:

PS-204 EPIDEMIOLOGY AND PUBLIC HEALTH

Learning objectives: The main objective of this course is to equip students with the basic concepts and methods employed in epidemiologic and public health research. At the same time, the course aims to equip the students with recent advances in the fields of epidemiology and public health system.

Course outcomes: Epidemiology and Public Health are most crucial part of the Population studies syllabus. It creates and applies methods for quantitative and qualitative research in health sciences.

Unit I

Epidemiology: Historical aspect, Definition, Components and Aims; Epidemiological Methods: Descriptive Epidemiology, Analytical Epidemiology - Case Control and Cohort Studies; Concepts of Attributable and Relative Risk; Concept of Experimental Epidemiology; **Concepts of Association and Causation; Uses of Epidemiological Studies.**

Unit II

Investigation of an Epidemic: Objectives and Major Steps; **Screening for Diseases: Concept, Use and Types;** Screening Test and its Evaluation; Randomized Controlled Trail: Concept, Steps, Types; Non-Randomized Trails: Concepts and Types.

Unit III

Health: Concept and its determinants; Public Health: concept and historical aspect; Health Care of the Community: Concept, Levels, Elements and Principles of Health Care; Assessment of Health Status and Health Problems; Primary Health Care in India: Village, Sub-centre, **PHC, CHC and District Levels; Health Insurance.**

Unit IV

Health System: Goals, Elements and Characteristics, Multi-Levels of Operations, Interactions and Interrelationships; Overview of the Health System in India; Policy Making: Key Components; Health Policy and Analysis: Policy Actors, Focus and Forms of Policy Analysis; **Development of National Health Policy:** Evolution of Indian National Health Policies in 1981-83, 2001 and 2017.

Unit V

Sustainable Development Goals; ICDS Programme; National Rural Health Mission; National Health Programmes on communicable diseases: **National AIDS Control Programme (NACP)**, Integrated Disease Surveillance Projects (IDSP); National health Programmes on Non-communicable Diseases: National Tobacco Control Programme (NTCP), National Mental Health Programme (NMHP).

Suggested Readings:

Banerji, Debabar (1985), *Health and Family Planning Services in India: An Epidemiological, Socio-cultural and Political Analysis and A Perspective*, Lok Prakash, New Delhi.

PS-205: POPULATION AND ENVIRONMENT

Learning objectives: Students will learn about our surrounding, habitat and how organic and non-living elements integral part of environment.

Course outcomes: Function of ecosystem, natural resources, environmental issues, energy and resource conservation, biodiversity etc. knowledge students will get after completion of this course.

Unit I:

Concept of Human Ecology and Environment; Ecosystem: Definition, Types, Structure and Component; **Concept of Food Chain, Food Web and Ecological Pyramid**; Natural Resources: Types, Renewable and Non-Renewable Resources, Resource Scarcity and Depletion; Biodiversity: Definition, Level, Values and Conservation.

Unit II

Environmental Degradation: Air pollution, Water Pollution, Soil Pollution, Noise Pollution, Green House Effect: Global Warming, Climate Change, Ozone Depletion, Acid Rain; **Population growth and carrying capacity**; Pressure of Population Growth on Land: Soil Erosion, Desertification, Deforestation and Soil Salinity.

Unit III

Environment in the Context of Development, Interrelationship between Population Growth, Environment and Development; Concepts of Development and Its Measures: Human Centered Development-Welfare Approach, **Investment in Human Capital Approach, Millennium Development Goals (MDG), Sustainable Development Goals (SDG)** in relation to Environment.

Unit IV

Implications of population growth on food supply, water, sanitation, housing, employment, health and education; Human Eco-systems: Ecological imbalance caused by natural and human factors and their impacts on human ecological systems; **Environmental Sustainability.**

Unit V

Environment in the Context of Development, Interrelationship between Population Growth, Environment and Development, Guidelines for Environmental Protection, International Protocols, Developmental Plans, **Polices and Strategies in India in the Context of Population and Environment.**

Suggested Readings:

Dash, M. C. and P. C. Mishra (2001), *Man and Environment*, Macmillan India, Calcutta.

Kumar, U. and M. J. Asija (2007), *Biodiversity: Principles and Conservation*, Agrobios (India), Jodhpur.

Sharma, P. D. (2000), *Ecology and Environment*, Rastogi Publications, Meerut.

Singh, Savindra (2015), *Environmental Geography*, Pravalika Publications, Allahabad.

Singh, Y.K. (2006), *Environmental Science*, New Age International (P) Limited, New Delhi.

Trivedi, P. C. (2004), *Environmental Pollution and Management*, Aavishkar Publishers, Jaipur.

Third Semester

PS-300: FAKIR MOHAN STUDIES

Specialization: A (Development Studies)

PS-301A: DYNAMICS OF DEVELOPMENT

Learning objectives:

This course aims to provide students with basic knowledge of Indian economy, human resource and development, economic theories, the structure, characteristics and growth of the Indian economy through different plans, policies and issues and economic evaluation of programmes and projects.

Outcomes:

This course will help students to gather knowledge about both National and International Development status. This will help student to come across various Index used for measuring level of development.

Unit I

Indian Economy: The Pre-British Period; Trend and Pattern of Economic Development after Independence; National Income, Human Resources and Development, **Occupational Structure**, Natural Resources and Environmental Quality, Infrastructure.

Unit II

Concept of Economic Growth and Development; Characteristics of Modern Economic Growth; Kuznets economic growth and income inequality; concept of sustainable development.; Assessing Development from Per Capita Income to PQLI; Human Development Index (HDI), **Gender Development Index (GDI)**, **Human Poverty Index (HPI)**.

Unit III

India as a Developing Economy: Meaning and Characteristics of Indian Economy as a Developing Economy, Major Issues of Development. Process of Industrial transition, Natural Resources, Economic development and environmental Degradation; Globalization: Meaning and Scope; **Globalization and its Advocacy**; Globalization and its Impact on India.

Unit IV

Non-specific Classical and Neo-classical Theories: Schumpeterian, Marxian; Rosenstein-Rodan; Stage Theory; Myrdal and Hirschman; Arthur Lewis's Two-Sector Model; **Big Push Theory**, **Liebenstein's Critical Minimum Effort Theory**, Harrod-Domar and Solow's Growth Models.

Unit V

Agriculture and WTO, Food Processing, Subsidies, Agricultural Prices and Impact of Public Expenditure on Agricultural Growth; Infrastructure in the Indian Economy: Energy, Power and Transport in India's Economic Development, Growth of Indian

Railways, Rail-Road Co-ordination; **Water Transport in India, Civil Aviation in India; Communication System in India.**

Suggested Readings:

- Bhagwati, Jagdish and Arvind Panagariya (eds.) (2012), *India's Reforms: How they Produced Inclusive Growth*, Oxford University Press, New York.
- Byres, T. J. (ed.) (1998), *The Indian Economy: Major Debates Since Independence*, Oxford University Press, Delhi.
- Datt, Gaurav and Ashwani Mahajan (2016), *Indian Economy*, S. Chand Publishing, New Delhi.
- Dreze, Jean and Amartya Sen (1997), *Indian Development: Selected Regional Perspectives*, Oxford University Press, Delhi.
- Kapila, Uma (ed.) (2019), *Indian Economy: Performance and Policies*, Academic Foundation, New Delhi.
- Puri, V. K. and S. K. Misra (2019), *Indian Economy*, Himalaya Publishing House, Mumbai.
- Tendulkar, Suresh and T. Bhavani (2012), *Understanding Reforms: Post-1991 India*, Oxford University Press, Delhi.
- Vakil, C. N., C H Shah and R P Nevatia (1979), *Agricultural Development of India: Policy and Problems*, Orient Longman, New Delhi.
- Bates, Robert H. (Ed.) (1988), *Toward a Political Economy of Development: A Rational Choice Perspective*, University of California Press, Berkeley.
- Chenery, H. B. and T. N. Srinivasan (Eds.) (1988), *Handbook of Development Economics*, Vol. I, North Holland, New York.
- Hettne, B. (1982), *Development Theory and the Third World*, Swedish Agency for Research Cooperation with Developing Countries, Stockholm.
- Kurien, C.T. (1996), *Economic Reforms and the People*, Madhyam Books, Delhi.
- Sinha, R.K. (Ed.) (1992), *Economic Crisis, Management and Challenges: Restructuring the Indian Economy*, Deep & Deep Publishers, New Delhi.
- Todaro, M.P. (1989), *Economic Development in the Third World*, 4th edition, Longman, London.

PS-302A: AGRICULTURE AND FOOD SECURITY

Learning objectives:

The paper analyses the role and importance of agriculture in the food production as well as growth and development of a country. Student will also learn about problems in agriculture, agricultural credit, and agricultural Marketing.

Outcomes:

It will help the students to understand the basic agricultural policies and food production in India. By the end of the course students will have clarity on agricultural policies and food production and distribution system in India.

Unit-I:

Agriculture in India: The place of Agriculture in the National Economy, Progress of Agriculture through Five-year plans, Present Position of Indian Agriculture, Green revolution, National Agricultural Policy-2020, Cropping pattern in India since 1951, Livestock and Dairy development; Agricultural Management: Concept, Scope and

Principle; Recent Trends in Agricultural Management; **Problems of Agricultural Management.**

Unit-II:

Land Reforms: Need and Scope, Abolition of Intermediaries, Tenancy Reforms, Ceiling on Land Holdings Operational land holding in India, Problems of sub-division and Fragmentation of Holdings, Co-operative Farming. Agricultural Marketing, Co-operative Marketing. Minimum Support Price for Food Grains; **NABARD and its Role in Rural Credit.**

Unit-III:

Food security: Concept, measurement; Food Insecurity and linkage to Nutrition, Determinants of food Insecurity, Dimensions of Food security problems. Household Food Security: Concept, Indicators, Measurement, Local food Systems, **Land Tenure and Food Security.**

Unit-IV:

Food Security in India: Concept, Food self-sufficiency and Food Security, PDS and its Impact on Poverty. Policy options for reforms of PDS. Mechanization of Agriculture and Food Security; Agricultural Subsidies: Subsidies on Fertilizers, Pesticides, Seeds. Flood, Drought and Monsoon Irregularities and Food Insecurity; **Farmers' Suicides and Agricultural Burden in India.**

Unit-V

Agrarian Structure of Odisha: Agrarian Economy, Productivity and Land Tenurial Systems; Land Reform; Trend in Industrial Productivity in Orissa; Odisha's Economy: Income, Employment, Consumption Expenditure and Cost of Living; **Agriculture and Allied Sectors, Industrial and Service Sectors.**

Suggested Readings:

Ahuja, Ram (1993), Indian Social System, Rawat Publications, Jaipur.

Kalaramdam, Sreevidya (2016), Panchayat Raj and Empowerment of Women, New Century Publications, New Delhi.

Kury, Helmut and Sławomir Redo (eds.) (2018) , Refugees and Migrants in Law and Policy: Challenges and Opportunities for Global Civic Education, Springer International Publishing, Cham.

Oommen, T. K. (2014), Social Inclusion in Independent India, Orient Blackswan, New Delhi.

Subramanyam. V. and K Sekhar (2010), Social Exclusion, Integration and Inclusive Policies, Rawat Publications, Jaipur.

Team PrabhatPrakashan (2019), Government Schemes, Missions, Campaigns and Programmes In India, PrabhatPrakashan, New Delhi.

The World Bank (2011), Poverty and Social Exclusion in India, Washington, D. C.

Young, Katharine G. (ed.) (2019), The Future of Economic and Social Rights, Cambridge University Press, New York.

PS-304A: Gender and Reproductive Health

Learning objectives: Students are expected to get clear idea of the concepts and evolution of the gender and reproductive health in India as well as at international level. Students will also able to learn different feminist theories and gender sensitive reproductive health planning. It is increasingly being realized that mitigating gender inequalities and enhancing women capabilities and entitlements are crucial to the overall development of the country.

Outcomes:

This course would provide students an understanding of the nature of the gender exclusion and their obstacles to the national economy on the basis of a scientific analysis. The contents incorporated in this course provide an analysis of issues at the gender level and also with regard to reproductive health issues prevailing in the Indian context. By the end of the course students will have clarity on basic concepts of gender exclusion and inclusive policy and its role in development of countries.

Unit -I

Definitions, Concepts and Terminologies: Gender, Unequal Gender Relations, Gender Equity, Gender Disparities, Gender Inequalities, Gender Main Streaming, Gender Sensitive Planning and Gender Balance; Feminists Theories: Evolution of Feminism; Shift from Women in Development to Gender in Development. **International and National Experience: Different Theories of Feminism.**

Unit -II

Gender and Social Institutions in India: State, Legal System, Religious, Family, Society, Marriage Customs and Patterns, Dowry System; Implications for Sex Ratio Trends and Patterns in India: Son Preference, Desired Sex Composition of Children, **Child Sex Ratio, Sex Ratio at Birth and Sex Selective Abortion;**

Unit-III

Gender Based Violence; Gender and Mass Media: Language, Image and Portrayal of Women in Different Mass Media; Gender Mainstreaming; Assisted Reproductive Technologies and its Use and Misuse; Measures to Address Infertility in India, **Gender Sensitive Financing and Budgeting.**

Unit -IV

Reproductive Health (RH): Definition and Rationale of RH Approach; Evolution of Ideas about Reproductive Health; Components of RH and Life Cycle Approach of RH; Abortion: Spontaneous, Induced Abortion, Legal and Illegal Abortions, Safe and Unsafe Abortions, Laws regarding Abortion in India; **Infertility: Measurement of Infertility, Sexual Dysfunction**

Unit -V

Gender and Reproductive Health: Rights Based Approach to Gender Equity And Reproductive Health and HIV/ AIDS; Gender and HIV/AIDS Vulnerability and its Demographic Impact; Reproductive Rights and Ethical Issues; Human Rights and Values:

Ethical Values in RH Services, Information, **Liberty of Choice, Professional and Ethical Issues.**

Suggested Readings:

- Basu, Alaka M., (1992): Culture, The Status of Women and Demographic Behaviour, Oxford University, New York.

Specialization: B (Monitoring and Evaluation)

PS-301 B: FUNDAMENTALS OF MONITORING AND EVALUATION

Learning objectives: The main objective of this paper is to train the students to use the techniques of monitoring and evaluation, which is commonly applied to understand and analyze project implementation problems/ gaps. The emphasis of this paper is on understanding M&E concepts with the help of statistical evaluative methods rather than learning statistics itself. Hence, in this paper a student will be introduced into various monitoring and evaluation concepts, which are useful for evaluating different projects.

Outcomes:

By the end of the course students will have clarity on the conceptual and applied monitoring and evaluation tools. It will help them in getting an idea how M&E is being done. M&E have a great opportunity in the current job market as it helps in decision making.

Unit- I

Introduction to Monitoring & Evaluation (M&E), Role of M & E in Programme/Project management; Distinction between Monitoring & Evaluation, Different Types of Evaluations: Cross-sectional, Experimental, Quasi-Experimental; **Theory of Change and Result Frameworks.**

Unit- II

Monitoring and Evaluation Framework; Requirement of Resources for Monitoring and Evaluation, Engagement of Stakeholders in Monitoring and Evaluation; Capacity Building for Monitoring and Evaluation.

Unit-III

Meaning of Indicators, Process of Developing Indicator, Illustration of Indicators Developed from Large Scale Surveys-DLHS, NFHS,LASI; Measurement, Need & Levels of Indicator; Challenges in Developing Indicators from Large-Scale Surveys; **Types of Indicators – Input, Process, Output, Outcome, Impact.**

Unit-IV

Monitoring of Programme/Project Implementation: Components of Programme/Project: Budget, Staff, Process of Monitoring, **Developing Tangible Indicators for programme/project**; Monitoring in terms of Input, Process, Output, Outcome, Impact; Result based Inference.

Unit-V

Evaluation Design: Determination of Sample Size under Different Approaches and Design Including Measurement of Change due to Interventions; Quasi Experiment Design, Case Control Design, Evaluation Terms of Reference- **Formative and Summative Evaluations**, Possible Errors during Evaluations.

Suggested Readings

- FHI (2004). Introduction to Monitoring and Evaluation Monitoring and Evaluation, monitoring HIV/AIDS programs: A facilitator's training guide. Family Health International
- GoI& UNDP (2012). Guiding Framework for Monitoring and Impact Evaluation of Capacity Building & Training of Panchayati Raj Institutions in States/UTs. Government of India and United Nation's Development Programme

- IFRC and RCS (2002). Handbook for Monitoring and Evaluation. International Federation of Red Cross and Red Crescent Societies –Geneva
- Rossi, Peter H., Mark W. Lipsey and Howard E. Freeman (2004). Evaluation, A Systematic Approach. Seventh Edition. Sage Publications – New Delhi.
- UNDP (2009). Handbook on planning, monitoring and evaluating for development results. United Nations Development Programme - New York.
- UNESCO (2014). Monitoring and Evaluation Guidance for School Health Programs: Thematic Indicators. United National Educational, Scientific and Cultural Organization.
- Kothari, C.R. (2004). Research methodology, methods and techniques (Second revised edition). New Delhi: New Age International (P) Ltd., Publishers.

PS-302B: ANALYTICAL METHODS IN EVALUATION

Learning objectives: This course aims to provide students with hands- on practice of evaluation tools which can be used in evaluations of different programmes/ projects. On completion of the course, the students shall be able to understand evaluation purpose; Evaluation methodology; Mandatory requirements for programme; SWOT analysis of different programmes, Social audits for different projects, etc.

Outcomes:

This course will allow students to get a deeper understanding of how M&E being conducted using various tools. It will also help students to know how MIS is being used in M&E to get real time error free monitoring and evaluation of projects.

Unit-I

Statistical Approaches of Evaluation of Intervention Programme: Statistical Inferences used in Different Intervention Design - z, t, F and Paired 't' Tests; **Difference in Difference Method**; Theory and Application, Advantage and Disadvantage, Regression Implementation.

Unit-II

Log frame Matrix; Mandatory requirements for programme; SWOT analysis of National Health Mission, Reproductive and Child Health Programme, **Integrated Child Development Services and National Adolescent Health Mission**; Social Audit - Data Requirement and Analytical Approaches, Case Study of Social Audit.

Unit-III

Management Information System and Use of Technology: MIS (Monitoring Information System)- Development of Indicators, Testing of Indicators and Finalization of Indicators; Role of Programmers; HMIS system; **Global Positioning System and Use of Other Technology**.

Unit-IV

Data Requirement at Different Stages of the Project; Evaluation at Different Points: Baseline, Mid-point, Concurrent and End-line Evaluation; Principles, Norms and Standards for Evaluation; Randomization, Statistical Design of Randomization; Randomized Control Trials, **Time Dependant Cluster Design, Interrupted Time Series Analysis**.

Unit-V

Cost Benefit Analysis (CBA): Calculation of Benefits, Calculation of Cost and Calculation of Net Benefits; Assumptions and Limitations of Cost-Benefit Analyses; Cost Effectiveness Analysis (CEA); **Systematic Reviews**; PRISMA 2020 Checklist; Meta-Analysis; Realist Synthesis.

Suggested Readings:

- Mishan, E. J. (2016). *Elements of Cost-Benefit Analysis*, Routledge, London.

PS-303 B: LARGE SCALE SURVEY DESIGN

Learning objectives: By the end of the course, the students should be able to:

- To understand the need for large data in monitoring and evaluation of population and development issues
- To introduce national and international surveys and guide students in managing these large-scale data
- To make students acquainted about different methods of collecting large scale data
- To familiarize students about management of large-scale surveys

Outcomes:

Students will come to know about how different large-scale survey are being conducted. Large scale survey monitoring and evaluation have a high demand in current job market. Student will get adequate knowledge about conducting large scale survey like NFHS, LASI and other.

Unit-I

Concept of Large Scale Surveys, Need for Large Scale Survey, Objectives Of Cross-Sectional, longitudinal, Rotational Surveys. **Sample Size Determination** and Sample Allocations for such Surveys to Districts, States and Regions in Terms of Individuals, Households and Primary Sampling Units.

Unit-II

Sources of Sampling Frame for Cross-Sectional, Longitudinal and Rotational Surveys; Explicit and Implicit Stratifications, Domain Controlled Sampling by Regions and Social Groups, **Merging and Segmentation Procedures for Small and Large Primary Sampling Units**. Mapping and Listing for Preparation of Frame for Last Stage Sampling Units. Sample Selection of PSUs and Households.

Unit-III

Revisit of Sub-samples, Field Check Tables, Non-response Pattern, and Quality lot Assurance, Roles of Supervisors, Editors, Field and Nodal Agencies; Third Party Audit; **Ethical Considerations in Large Scale Sample Surveys**.

Unit-IV

Computer Assisted Personal Interview (CAPI), Process of Data Transfers, Introduction to Features of Census and Survey Processing System (CSPRO), Steps for Development of Data

Entry Software in CSPro, Estimation of Sampling Weights, **Preparation of Factsheets, Reports and Other Deliverables.**

Unit-V

Introduction to Evaluation of Population, Health and Family Welfare Programme, Objectives of the Evaluation, Types of Evaluation, Evaluation Framework, Types and Levels of Indicators in FW Programme Evaluation, **Discussion on Methodological Issues in Different Evaluation Studies in India.**

Suggested Readings:

Bertrand Jane T., Robert J. Magnani, Naomi Rutenberg(1994): Handbook of Indicators for Family Planning Programme Evaluation, The Evaluation Project, Carolina Population Center, University of North Carolina at Chapel Hill, USA.

PS-305: RUDIMENTS OF POPULATION STUDIES (CBCS)

Learning objectives: This course aims to provide students with the most basic and important facts of Population Studies.

After completion of this course the student will be able to:

- Learn scope and relationship of Population Studies with Other Disciplines
- Distinguish among different concepts and measures used for fertility study
- Basic Measures of Nourishment, Morbidity and Mortality
- Concepts and Measures of Migration and Population Ageing

Outcomes:

This paper will provide an overview of population studies and demographic techniques which will allow students from different disciplines to have a better understanding of subject. It will also help student for convergence of parent subject with Population Studies.

Unit I

Population Studies: Scope and Relationship with Other Disciplines; Views of Malthus and Karl Marx on Population; Theory of Demographic Transition and its Different Stages; Sources of Demographic Data; Age-sex Structure and its Common Measures.

Unit II

Fertility: Concept and Basic Measures - Crude Birth Rate, Age-specific Fertility Rate and Total Fertility Rate (TFR); Gross-Reproduction Rate (GRR) and Net Reproduction Rate (NET), **Methods of Family Planning; Determinants of Fertility**; Theories of Fertility: Social Capillarity Theory, Theory of Diffusion and Cultural Lag, Theories of Leibenstein.

Unit III

Concept of Health Status: Nourishment, Morbidity and Mortality; Basic Measures of Nourishment, Morbidity and Mortality; **Factors affecting Infant Mortality**; Factors Affecting Mortality Decline in India; Concepts of Life expectancy and Life Table.

Unit IV

Migration: Concept of Mobility and Migration, Sources and Quality of Data, Types of Migration- Internal and International, Determinants and Consequences of Internal Migration; Factors affecting Population Distribution; Urban Area, Urbanization and Urban Population Growth; **Urban Problems in India.**

Unit V

Concepts and Measures of Population Ageing; Components of Population Ageing; Inter-relationship between Population Ageing, Fertility, Mortality and Migration; Population Ageing and Momentum of Population Growth, Age Structure Transition and Ageing, and Declining Population; **Population Policies in Developed and Developing Countries with Special Reference to India.**

Suggested Readings:

- Bhende, A. and T. Kanitkar (2010), Principles of Population Studies, Himalaya Publishing House, Mumbai.
- Chandana, R. C. (2002), Geography of Population: Concepts, Determinants and Patterns, Kalyani Publishers, New Delhi.
- Das Gupta, Monica, Lincoln C. Chen and T. N. Krishnan (eds.) (1996), Health, Poverty and Development in India, Oxford University Press, Delhi.
- Desai, A. R. and S. Devidas Pillai (eds.) (1990), Slums and Urbanisation, Popular Prakashan, Bombay.
- IrudayaRajan, (2007) Social Security for the Elderly Experiences from South Asia, Routledge, New Delhi.
- Pathak, K. B. and F. Ram (1992), Techniques of Demographic Analysis, Himalaya Publishing House, Bombay.
- Siegel, Jacob S. and David A. Swanson (eds.) (2004), The Methods and Materials of Demography, Elsevier Academic Press, San Diego.
- Srinivasan, K. (1998), Basic Demographic Techniques and Applications, Sage Publications, New Delhi.
- UNFPA (2001), Population Ageing and Development: Social, Health and Gender Issues, United Nations, Malta.
- World Health Organization (2015), WHO Report on Ageing and Health, WHO, Geneva
- Yadava, K. N. S. (1989), Rural-Urban Migration in India: Determinants, Patterns and Consequences, Independent Publishing Company, Delhi.

Learning Objectives: This course aims to provide students with hands- on practice of statistical techniques which can be used in demographic analysis.

Course Outcome:

On completion of the course, the students shall be able to:

- Know about practical use of different statistical techniques for different research purpose
- Use different graph for data visualization.
- Use sample size determination techniques and tools for estimating sample size.

1. Histogram and Bar-diagram	7. Mean, Median and Moving Average
2. Frequency Polygon and Curve	8. Standard Deviation
3. Ogive: Less and More than Types	9. Pearson Correlation Coefficient
4. Proportion and Pie-chart	10. Linear Regression Equations
5. Age-sex Pyramid	11. Disparity Indices
6. Arithmetic and Exponential Growth Rates	12. Sample Size Determination

PS-402: DEMOGRAPHIC TECHNIQUES AND MEASURES

Learning Objectives: This course aims to provide students basic idea about the various demographic measures and techniques used for research purposes.

Course Outcome:

On completion of the course, the students shall be able to:

- Know about practical use of different demographic tools and techniques.
- Analyze the trends and prevalence of fertility, morality and migration.
- Calculate burden of disease, life expectancy, quality of demographic data and socio-economic inequality in the society.

1. Myer’s Index and Whipple’s Index	7. National Growth Rate Method
2. United Nations Joint-score Method	8. Census and Life Table Survival Ratio methods
3. Measures of Fertility and Standardization of CBR	9. Lorenz curve
4. Measures of Mortality and IMR Adjustment	10. Gini’s concentration ratio
5. Construction of Life Table	11. Methods of interpolation and extrapolation
6. Vital Statistics Method	12. DALY and DALE

PS-403: SPSS FUNDAMENTALS (PRACTICAL)

Learning objectives:

In this paper students will learn handling of large scale data and analysis of advanced statistical techniques in SPSS software. Such as, creation of data frame, data editing, data merging, syntax writing, construction of indices, correlation, and regression analysis etc. Data analysis and interpretation of the result is the major part of learning in this section.

Course Outcomes:

After successful completion of this paper student will get the ability to handle large scale data such as NFHS, DLHS and LASI etc. and their analysis skill using advanced statistical techniques and methods, which will help them to develop analytical skills.

1. Creation of Data Frame	7. Cross-tabulation
2. Editing of data	8. Construction of Indices
3. Merging files	9. Pearson Correlation Coefficient
4. Syntax writing	10. Linear Regression Equations
5. Recoding and computing	11. Logistic Regression
6. Likert Scale and Index	12. ANOVA

PS-404: Proposal and Findings Presentation**PS-405: Dissertation and Viva-voce**

*Bold-marked bits in each unit of every theory paper are for self-study by the students under the guidance of concerned teacher.
